

Passware Password Recovery Kit Enterprise v.11.1

Reduce time spent on recovering passwords and get more control over corporate security.

Passware, Inc., has combined all its proven password recovery tools and encryption detection technology in an all-in-one user interface to provide system administrators and IT professionals with the complete solution for password-related issues.

Passware Kit Enterprise includes over 30 password recovery tools and Encryption Analyzer to provide immediate password recovery for any and all protected files detected on a PC or over the network while scanning.

It recovers or resets passwords for more than 200

different types of files. Many types of passwords are recovered or reset instantly, and advanced acceleration methods are used to recover difficult passwords.

Passware Kit Enterprise also decrypts BitLocker and TrueCrypt hard drives, recovers passwords for PGP archives, and instantly unlocks Windows 7 Administrators.

Efficient use of multi-core processors and multi-CPU systems, eight password recovery attacks, nVidia GPU and TACC acceleration, distributed computing – all contribute to improved decryption performance.

Features	Benefits
All-in-one password recovery for 180+ file types	Recover all types of passwords for almost any file
Integrated Encryption Analyzer scans computers for password-protected items	No encrypted file on a PC is skipped
Recovers encryption keys for BitLocker-encrypted USB and hard drives	Decrypt BitLocker and TrueCrypt hard drives in minutes
Instantly decrypts mounted TrueCrypt volumes, or recovers passwords for unmounted containers	
Resets passwords for Local and Domain Windows Administrators	Get Administrative access to any computer in minutes
Recovers password Mac keychain files	Get access to saved passwords, private keys, certificates, etc.
Extracts passwords from Windows/Unix/Mac hashes	Recover user account names and login passwords
Extracts passwords from registry files and SAM	Recover passwords for Windows users, websites, and network connections of a standalone system
Instant online decryption of Word/Excel files up to version 2003	Unprotect important documents immediately
Supports Distributed Password Recovery and Amazon Compute Cloud	Accelerate password recovery with distributed and cloud computing
Efficiently uses multi-core CPUs, multiple nVidia and ATI GPUs, and Tableau TACC hardware accelerators	Reduce time spent on recovering difficult passwords
Basic password recovery attacks: Dictionary, Xieve, Brute-force, Known Password/Part, Previous Passwords	Set up the password recovery process in the most precise way
Password modifiers supported (case changes, reversed words, etc.)	
Combination of attacks for passwords like "strong123password"	
1-year Subscription to updates included	Get all updates and additions free for one year

System Requirements: MS Windows 7/Vista/2008/2003/XP/2000 (32-bit or 64-bit) • 1 GHz processor • 512 MB RAM
